

- In Sudbury there are lakes that have been contaminated from the mining industry and this has caused a depression in the economy and has affected tourism in the area.

○ Obama care.

- Canada is close to the United States and we often watch more television and movies and read more books and media from there. Styles and trends are largely American flavoured here. Changes are often influenced South to North and vice versa as we have more LGBT friendly laws and they are moving in that direction.

- Many First Nations groups in the past were very community based, decisions were made on how the group would be affected if changes needed to occur the entire group outcome would be considered.

- Me to We concerts in Toronto influence youth to move in a direction that will change society to make it more group oriented and less focused on the individual.

- In Canada we are more open to the idea of same sex marriages but this wasn't always the case and the polls showed that approximately 55% were in favour 10 years ago, after the laws changed more people became comfortable with the whole thing.

- Facebook has been tied to the whole Arab Spring Revolution as a major organizational factor.

Some of our best and brightest
are moving to the states to work
tempted by the strong dollar.
